

The Emergence of Integral Consciousness in Europe

2 0 1 4

8-11 May in Budapest, Hungary

## CONFERENCE PROGRAMME

## Dear IEC participant,

WELCOME to Budapest - we are so thrilled to have you here with us!

You have made a commitment and took considerable effort to come and dedicate these days of your life to the unfolding of the integral movement in Europe. Your presence and your contribution make a huge difference and make this possible in the first place.

In June 2012 a gathering of around 20 representatives of several European integral initiatives took place in Berlin. And now – not even two years later – we are here at this momentous conference. Let's appreciate this for a second. What is this mysterious force, this strange attractor, pulling together all these people from different countries? "The Emergence of Integral Consciousness in Europe" is expressing itself in a wide variety of domains and in diverse cultural articulations. We are so excited to make this treasure more visible and accessible now!

Organizing an international conference like this is very much like pushing yourself over the cliff and trying to assemble an airplane while you are falling. This is uncharted terrain, you have to have a lot of faith and stick to your vision no matter what. For most of our team members it has been one of the most challenging yet joyous projects of our lives. The miracle is that we are soaring now – together with you.

We are overwhelmed by the love and commitment of our dedicated international team that after a long series of virtual exchanges will finally be able to physically meet these days. We are moved by all the support live energies and praise for our work that we have received along the way from many of you from all over the world and by others who due to health or other reasons could not make it in person like Ken Wilber himself.

We are now giving birth to a European identity of the integral community, empowering Europeans with a significant role in the larger integral global movement.

So let's use this golden opportunity that we have given ourselves by being together here to co-create the beginning of a powerful wholesome force in the world – emerging Integral consciousness rippling forth in all directions to gently embrace all aspects of reality – you, me and us – with ever-widening love, care and compassion.

That's what we all came here for, remember?

With deep love and gratitude,

**Bence Gánti & Dennis Wittrock**

# INTEGRAL

## ACADEMY

### ***The Host of the Conference:*** **Integral Academy, Hungary**

Opening its doors in 2006, Integral Academy is an independent transformative adult education school in Budapest, Hungary, in Central Europe. The mission of the academy is to teach integral theory and practice in a deep and structured manner while supporting people's personality growth to the integral structure-stage.

We train and certify integral counselor practitioners. The uniqueness of our school lies not only in its all-round integral theoretical education, but also in its practical nature: its transformative-communal power.

We have created a transformational education where besides the systematic in-depth theoretical program students undergo a three-year group psychotherapy process together and two years of integral counselor training within the same group. Here they develop their practical therapeutic skills. Students are also required to participate in a 2-week silent vipassana - or similar - meditation retreat. They live in an evolutionary and transformative community.

As a result of the interplay of three years of progressive theoretical training, therapeutic group experience, meditation retreat and practical therapeutic skills training - their personality develops and unfolds into Wilber's level 6 - an integral structure-stage.

We believe that our task today is to promote people's growth in personality through such communities. Thinking might grow in the individual mind, but personality doesn't. We maintain that personality grows in community, because personality manifests through relationships. Authentic and healing relational we-space practices transform people into more refined, aware, compassionate and subtle human beings that we call level-6 (green-yellow-turquoise) personality.

*"Integral Academy is an important application of my work and the work of many other Integral thinkers, teachers, and practitioners. Please take the time to look through their website, and hopefully connect with them and their associates to further your own Integral understanding. Sending all my very best wishes, Ken Wilber."*

# Integral Europe

inspire, create, connect

**About Us:** Integral Europe was founded in June 2012 after an initial gathering in Berlin. Current board members are Dennis Wittrock (Germany), Bence Gánti (Hungary), Raquel Torrent (Spain), Miriam van Groen (Netherlands) and Kevin Solinski (France).

**Our Purpose:** The purpose of Integral Europe is to embody, represent, teach, develop and give voice to integral consciousness and its resulting practical applications on a European basis.

As our common reference point and basis we use the AQAL model of Ken Wilber, while also being open to alternative, like-minded, like-spirited, encompassing and integral approaches.

**Our Vision:** Our vision is to weave together European initiatives to develop integral practices, bringing peace and blessing to the world.

**Our Structure:** Integral Europe is experimenting with the Holacracy™ operating system (a “social technology for the purposeful organization”) which we consider to be an expression and application of integral consciousness for the organizational level.

## Our Projects:

- ❖ European web-directory of country pages and national integral representatives
- ❖ European Integral Conference in 2014
- ❖ regular bi-monthly virtual community gatherings
- ❖ international events, workshops, gatherings with European integral experts and teachers
- ❖ the creation of an Integral European Academy with the best integral teachers and programs

## Join Us:

- ❖ Sign up for our Integral Europe Newsletter via our website
- ❖ Join our facebook fanpage: [facebook.com/IntegralEurope](https://facebook.com/IntegralEurope)
- ❖ Sign up for our virtual community gatherings (video-conference)
- ❖ Add your integral country profile to our website [www.integraleurope.org](http://www.integraleurope.org)

## The History and Introduction of the Conference

In the past decades, integral consciousness has emerged on a large scale in continental Europe and it has spread over the whole continent. We see that Europeans don't simply repeat Ken Wilber's integral approach, but they define and translate it creatively by and to their own cultural characteristics. Based on the same principles, there are differences between a Hungarian, a German, a Russian, a Swedish or a Spanish integral thinking and embodiment. Everybody translates Integral Theory into their own view. This is a very exciting finding and based on this we can state that there is a European Integral Community and the members of this extended community have been very much waiting to meet each other.

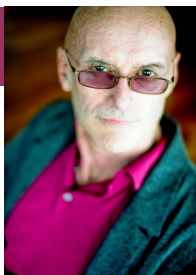

This impulse gave birth to the Integral European Team in 2012. The mission of the Team is to connect integral thinkers of Europe and make them visible for one another. Even if integral theory is present in many countries, sometimes integral communities connect locally or there are some cross-border collaborations, but until now, nobody made an overview of Integral European Communities or invited them for a common conversation. Some of us visited local or American conferences, but most of us never crossed our own borders and do not know integral experts of foreign countries.

The Integral European Team recognised the necessity of breaking down the boundaries, so the first big integral gathering of Europe is organised in this spirit.

**At the 1st Integral European Conference, held from May 8-11, 2014, we will gather to witness, celebrate and express „The Emergence of Integral Consciousness in Europe” – where we can share our knowledge, practices and experiences.**

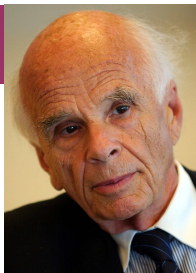

We will use formats that allow plenty of heart and mind exchange - ranging from scientific discussion through short spotlight-presentations to deeper, transformative group and community processes. The IEC is designed not to be a purely academic and intellectual conference - at IEC we will experiment with an integral format where academic science, transformation and the we-space converge; where a knowledgeable, playful and communal marriage of sense and soul consciously meet.

## **Ken Wilber** (USA) – on video and on live call – Thursday 16.00 **Thoughts on Europe and on Integral**

“The region of the Earth that is at this point the closest to genuine emergence of this integral awareness appears to be Europe. It might not seemed this way at first, initial superficial plans, but remember, integral itself is at this point only a very small percentage of the population anywhere. So we have to look more carefully for clues here. And thus Europe has the slight edge in structural developmental evolution heading toward integral.”

In his video address Ken Wilber talks about the role of Europe and the USA in the evolution of humankind, about the present situation of integral and the significance of the 1st Integral European Conference in this whole process.

## **László Ervin** (Hungary) – Thursday 15.00 **Integral Consciousness in a Self Actualizing Cosmos**

A fundamentally different concept of the nature of cosmos and consciousness is emerging at the cutting edge of the contemporary sciences: it recalls and substantiates some of the basic insight of the great cultural traditions. This “whole system,” instantly entangled “nonlocal” cosmos provides the basis for an integral concept of consciousness that likewise recalls some perennial insights.

Intuitions of wholeness and integrality are coming back to the contemporary world supported by quantum physics and quantum neuroscience.

## **Thomas Hübl** (Germany) – Friday 9.00 **Transrational Mysticism and its Effect on Culture**

In his keynote presentation he will be exploring how a transrational mystical practice can be a cultural impulse that will bring back wisdom and insight into a marketplace that is challenged to evolve, how timelessness and evolution are actually not “either or” but “both and”.

He will speak about the contemporary marriage between an inner and an outer science as an implicit task of our time.

[cook-greuter.com](http://cook-greuter.com)

## **Dr. Susanne Cook-Greuter** (USA / Switzerland) Wednesday 14.00 (Workshop), Saturday 9.00 **On Being Human**

I will explore some universal aspects of the human condition.

1. The need of the human ego to know and understand.
2. The lottery of our birth and how it relates to unexamined beliefs.
3. The need to matter and create a sense of permanence and significance in the face of death.

[www.drrogerwalsh.com](http://www.drrogerwalsh.com)

**Roger Walsh M.D., PhD.** (Australia / USA) – Thursday 17.45  
**The State of Integral - Now and Future**

Although integral ideas are spreading rapidly, the integral vision remains the province of what sociologists deem a “cognitive minority.” Extending and optimizing Integral Theory’s impact will require many things from practitioners, especially high-quality work and becoming “gnostic intermediaries.” Ways in which integral ideas can enhance practitioners’ own lives are surveyed, and the presentation addresses potential traps that await both individuals and integral groups (e.g., egocentric misuse of integral ideas, developmental complacency, spiritual materialism, metapathologies and metadefenses, and failure to engage the mainstream). Antidotes to these traps are suggested so they may be transformed from stopping points into stepping stones.

[embeddingthriveability.org](http://embeddingthriveability.org)

**Dr. Robin Wood** (France) – Sunday 9.00  
**An Integral Prayer for ThriveAbility**

With his contribution Dr. Robin Wood will review the “WHY?” and “HOW?” questions for Integral Practitioners. Most of those attracted to Integral Theory and Practice are interested both in their own personal development and in making the world a better place - often in roles and careers like training, coaching, writing, entrepreneuring and advising as applications of their integral capabilities.

Robin will take us through the core principles of how this can become a reality, and will show us how ThriveAbility works across all four quadrants to mobilise decision makers at all levels of the spiral, with a particular focus on peak/exiting orange and green, so that we can scale integral practices and solutions to meet the massive challenges we face as a species in the next century.

**(Eldor) László Honti** (Hungary) – Sunday 9.00  
**Mapping the Social Field of IEC - a Software Assisted Communal Experiment**

In (Eldor) László Honti's „Mapping the Social Field of IEC - a Software Assisted Communal Experiment” IEC participants will get the chance to become part of a large sociometric experiment: assessing the IEC audience with the help of a groundbreaking and exciting new software application. By giving instant feedback via their electronic devices on the spot (smartphones, tablets or PCs) we will be able to paint a picture of the group-psyche present in the conference. With a simple live question and answer test we will be able to unveil hidden clusters of information, tap the intelligence of the field in the

room and visualize it on the main stage.
